

PRESS RELEASE

EAACI Congress 2020 goes digital

9 April 2020

EAACI will organise its Annual Congress as a fully digital event from June 6 to 8 2020. Our community will access to more education, scientific news and best practice exchange without leaving home. Challenging times call for creative solutions!

Under the timely motto “Bridging innovations into Allergy and Asthma Prevention”, we will offer the opportunity to explore the rich scientific programme in a truly innovative way. Sessions will delve into omics, big data, mHealth and the development of artificial intelligence, endotype and theratype approaches that change not only the taxonomy but the way we perceive and manage allergic diseases.

What better way to be updated on the conceptual and technological advances in our field, than by taking part in a brand-new technological approach to our EAACI Annual Congress?

Over a three-day period, participants can tune in and watch a variety of virtual sessions, while having the possibility to discuss important topics with the speakers via the interactive Q&A. Our vast number of abstracts, posters, and webcast symposia and workshops with novel research being undertaken by our experts worldwide can be consulted online at any time during the congress period and subsequently over the summer.

Virtual congresses provide many advantages for speakers and participants: flexibility; a wider reach that can aid the dissemination of your work to a larger international audience; the ability to watch multiple symposia and access all the information without missing out and in your own time; and the possibility to still interact and network with your peers through our tailored web-based solutions.

While we look forward to seeing you again in person at EAACI Congress 2021, we hope you will contribute to making the first ever digital EAACI Annual Congress a success in 2020, through your participation, state-of-the-art science and adaptability. The EAACI Family is an impressive network of dedicated specialists, let’s work together to stay connected and extend our reach and break-through science via digital means and beyond the existing barriers.

Stay tuned on [EAACI.org](https://www.eaaci.org) for updated information on registration, congress logistics and our scientific programme.
